### *Expanded Memory Size*

Store up to 499 designs with a basic memory capacity of 10 million stitches.

### *Mirror Image Conversion and Design Direction*

Designs can be rotated from 0° to 359° in 1° increments. Designs can also be flipped horizontally or vertically.

### *Reduce and Enlarge Designs*

Selected designs can be enlarged or reduced from 50% to 200% by 1% increments and in any direction.

### *General Repetition Work*

One design can be repeated up to 99 times along X, Y and both directions.

### *Automatic Offset*

The frame automatically returns to the offset point when the embroidery is finished to make it easier for you to switch the frames. You can select Automatic Offset at parameter select mode to move the frame automatically to the desired point, making it easier to do appliqué and emblems.

### *Manual Offset*

Allows the user to manually move the frame to a pre-selected point. This feature makes it easy to do appliqué or to change frames while embroidering.

### *Origin Return*

Frame can returned to origin point of design during embroidery work.

### *Non-Stitch Function*

The frame and the needle bar can move back and forth by the units of 1, 100, 1000, and 10,000 stitches and by color without stitching.

### *Frame Reversal*

When the thread breaks or runs out of track, you may move the needle bar back to the starting point of the design in the units of one to ten stitches.

### *Automatic Return*

Frame will move back to its last position after power interruption. This function helps minimize stitch errors while embroidering.

### *Editing*

Edit jump stitches, trims, and end points from the control panel.

### *Supports Many Design Formats*

All SWF embroidery machines support multiple design formats to help maximize your production capabilities.

### *USB Ports*

4 x USB ports allow you to easily move designs to and from your embroidery machine using USB external storage devices.
